

Back in 2005/6 there was little or no info on Hurley 22s built since the beginning of 1975, so I reserched them from 2006-16. I beleave, post 1974 700s were all built in UK and then exported to the Netherlands and marketed there as the H700.

The "Hull Year" is the year the boat left the yard, the "Owners Year" is the year they beleave them to be.

If you have any info to fill in any gaps in this data please contact us at info@hurleyownersassociation.co.uk
